

A Magical Workshop on The Art of Creative Teaching

Parents are children's best teachers.

This workshop is designed for **PARENTS & TEACHERS** who deals with **children below 12 years old.**

1-day workshop

16 August 2009 (Sun)

9.00am - 5.00pm

Venue: IDC Group,
Amcorp Trade Centre,
Petaling Jaya, Selangor

Learning must be FUN!

It must be, so that students can be motivated to **want to learn more.** **Getting students excited about learning** is the **Teacher's constant challenge** on top of trying to get attention, participation, and retention.

The answer lies in ... incorporating creative teaching techniques into our lessons.

Spicing up our lessons well could easily help us increase retention significantly and increase applications probability.

This one-day magical workshop aims to help teachers understand the true nature of effective teaching and learning. It helps teachers learn how to design and deliver creative lessons that results in faster and better learning through the use of creative tools. This will enable teachers to deliver content in a way that is **FUN** yet remaining relevant and effective. This workshop emphasizes **helping student to learn** rather than teaching them.

Workshop Outline

- ✓ The importance of using meaningful set induction
- ✓ The art of telling stories
- ✓ Using humor to liven up the class
- ✓ Using magic to arouse interest, promote discovery and increase retention
- ✓ The importance of teaching aids
- ✓ The importance of excitement in teaching and learning
- ✓ Seeing things from children's perspectives
- ✓ Teaching with love and concern
- ✓ How to motivate reluctant learners
- ✓ How to cater for gifted children
- ✓ How to overcome careless mistakes
- ✓ Turning failure into success
- ✓ Using magic to increase retention

Who Should Attend

- ✧ Parents who wish to provide conducive learning environment at home.
- ✧ Educators of any level from preschool to teacher educator.

About the Trainer

Teoh Poh Yew is a dynamic and creative Mathematics educator who firmly believes that everyone can learn and enjoy this "dreaded" subject. With more than 20 years experience in this field, her passion lies in transforming Mathematics into a tool to develop children's creativity, enhance mathematical thinking skills and sharpen problem solving abilities. She inspires children to approach this subject with confidence and enthusiasm.

Poh Yew is also a very experienced international Trainer in the fields of creativity, Maths education, early childhood education and training of Trainers' programs. She conducts extremely innovative workshops for corporate leaders, teachers, Trainers, parents and students in 14 countries such as Malaysia, Singapore, China, Bulgaria, Denmark, United States, Germany, etc. She has also published 3 books on mathematical magic. She appears regularly on TV, radio, magazines and newspapers to share her creative and magical approach in teaching and training.

Trainer

Feedback for Poh Yew's Workshops

I first met Poh Yew at a conference in Mathematical Creativity in Bulgaria and was drawn to her work, not only because of her own very contagious enjoyment of mathematics but also because of her ability to explain the mathematical concepts behind the games and tricks to people with a wide range of mathematical backgrounds and interest. From children with their parents to professor of mathematics, all were drawn into her activities.

*Prof. Linda Sheffield (Regents Professor, Mathematics Education)
Northern Kentucky University, USA*

This is the most interesting maths course in my 24 years of service. I admire your courage and persistent in doing your work. Hope to attend another Maths course conducted by you. With the knowledge that you had imparted to us, I will try to apply them to my blind students. 3 days are not enough.

Mariana Yusuf, Sarawak

I'm really impressed with your creativity power. I've attended many kinds of workshops and this workshop was the most interesting one! I couldn't wait to show some of the magic tricks that just learnt to my 5 year old daughter. She was so impressed with "my" magic show. She enjoyed so much playing these cards and keep coming up with all kinds of games created by her creativity. Thanks for leading us and our next generations to the wonderful creative wizard world!

Elaine Tan, Kuala Lumpur
